

## CATALYTIC CONVERTER MARKING & REGISTRATION PACK

The theft of catalytic converters is a growing problem – particularly for owners of 4x4 vehicles, large vans and motor homes. The theft of a CAT can be expensive and will almost certainly result in you losing the use of your vehicle for a number of days.

One simple and inexpensive way to reduce the risk of your CAT being stolen is to protect it with the Retainagroup security marking and registration system.

Available for only £9.95 (including P & P and VAT), the simple to use DIY pack consists of an ultra destruct label together with marking fluid which permanently etches the security code and 24/7 telephone number of the International Security Register (ISR) into the CAT. A window warning decal is also included. Even if a thief removes the label, the etched mark remains in place meaning that if the CAT is stolen the identity of the vehicle to which it belongs can be verified immediately by calling the ISR on which vehicle and owner details will have been registered.

To purchase a marking and registration pack, or to find out more about our system, please call 01233 333000 at any time.
